

# Microsoft Azure Security Assessment

Get a comprehensive report of security gaps + recommendations for your Azure environment

## Secure Gaps in Your Azure Environment

You have Microsoft Azure to optimize and modernize your IT infrastructure at enterprise scale. Since it's tied to the productivity of your organization, maintaining the security of your Azure tenant is extremely important.

In this assessment offered by Bulletproof, we will review the security posture of your Azure tenant and applicable architecture of security controls. We will then provide a gap analysis of current state and vulnerability.

You will receive best practice recommendations to ensure your Azure tenant is secure to host app services that are aligned with the Microsoft Azure's Well-Architected Framework and CIS Benchmark without impacting your users.

## About Bulletproof

With locations across North America and around the globe, Bulletproof, a GLI company has decades of IT, security, and compliance expertise.

Bulletproof works with various industries of all sizes and leverages its extensive industry experience to mitigate risk and improve client processes, systems, and business infrastructure.

## What to expect during the 3-week assessment period

Once you provide access to your Azure subscriptions and an architecture overview, Bulletproof will analyze the environment.

Once reviewed, Bulletproof will schedule exploratory Q&A sessions.

You will then receive a comprehensive technical report with prioritized recommendations.
